PRODUCT

What Cobalt is

Bridge on the sim PC. Cobalt on iPhone, iPad, or Android. Free for live map and Lock Screen on the same Wi-Fi. Peak when they want systems, ATC Inbox, and Relay on cellular.

Live map

Their aircraft plus VATSIM / IVAO traffic and controllers.

Lock Screen

Progress, altitude, and a ticking ETA away from the desk.

Systems

Autopilot, lights, engines, cameras from the couch. Peak.

ATC Inbox

Controller messages on the phone, even if Cobalt was closed. Peak.

Atlas

Hours and history that feel like a real pilot logbook.

Free vs Peak

Systems + Inbox

Trio

Video ideas

01 Walk away mid-cruise. Lock Screen still ticking ETA.

02 Couch systems. Toggle from the phone. Sim reacts.

03 ATC on the phone. Message lands in Inbox. Reply without walking back.

04 Setup under 3 minutes. Bridge, connect, wheels up.

05 After landing. Atlas share card.

06 Same Wi-Fi vs Peak Relay. Honest free vs paid.
